### Bi-Weekly Report

In the last two weeks I've created file folders for different community organizations, assisted in updating the community organizations database for Ward 5 and I also went out into Ward 7 with Ms. Harris. While out with Ms. Harris she pointed out how wards 6, 7, and 8 are mixed together in certain areas. I learned how to spot out different physical dangers in the community like abandoned or dangerous vehicles and abandoned homes. We visited Fairlawn Estates which appeared to be a very beautiful community from the entrance. Once we actually drove around the community we saw how poorly paved it was and she told me that all but two of the houses there had electricity, one of the house was set on fire and that the homes could not pass inspection because of how they were poorly built. Friday I attended another Mayor's meeting and two workshops. One of the workshops was about the different agencies that shared the building with us and the other was on women's fitness. In conclusion, my week was productive.
